Fort Huachuca, in this county, is now the principal government post in southern Arizona, owing to its close proximity to the Mexican line.

The late city election at Tucson cost \$168,72. The Gazette wonders how the two cents was figured in the bill, and as it has not yet been explained is still a mystery.

W. M. Stillwell, formerly of Tombstone, is mentioned as one of the prominent candidates for the appointment as U. S. Attorney for Arizona. His chances look very favorable and he may knock the perimmon.

The New York Sun has at last discovered that there are pension frauds. It says that there are 727,000 survivors of the war, including widows, when 947,919 persons are drawing pensions from the government.

The weather in Tucson, Phoenix, Prescott, and in fact all over the territory was never so severe and complaints are being heard from all quarters. Even in Tombstone the weather is not what it should be and we cannot account for it unless it is caused by those spots on the sun.

BUCKLIN'S ARNICA SALVE.
The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, teeter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures Erysipelas, or no payment required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale at Tombstone Drug Store.

POSTAGE STAMP ITEMS.
Canadian dealers and speculators are going frantic in their efforts to work off the postage stamps at high prices. As a result, prices are steadily falling, and before many weeks they may be selling at their face value.

An American who is traveling in Europe at the present time, reports having seen a block of 50 of the five-cent 1851, unused and with full original gum. A German dealer recently secured this unique treasure, and has refused an offer of \$500 for it.

At the second congress of the Olympic games, which opens in Harve, France, it is likely that Paris and the year 1900 will be decided upon for the next revival of the Olympic games. The occasion will also be marked by the issuing of a new series of postage stamps.

A collector of Confederate stamps has given it as his opinion that the ten-cent 1863 with blue outer line is a very scarce stamp on the original cover the proportion being very small to the commoner variety. It was this gentleman who discovered the rare Livingston (Miss) local, which turned up in the south some years ago.

The Taming Women.
Who goes to the club while her husband tends to the baby, as well as the after her home, will both at times get run down in health. They will be troubled with loss of appetite, headaches, sleeplessness, fainting or dizzy spells. The most wonderful remedy for these women is Electric Bitters. Thousand of sufferers from Lame Back and Weak Kidneys rise up and call it blessed. It is the medicine for women. Female complaints and nervous troubles of all kinds are soon relieved by the use of Electric Bitters. Delicate women should keep this remedy on hand to build up the system. Only 50c. per bottle. For sale by Tombstone Drug Store and all druggists.

The well-known novelist, Gabriel d'Annunzio, has been successful in his campaign to be elected deputy for Francoville in the Italian chamber.

A Herald cablegram states that Henri Rochefort, the well-known editor of the Intransigent, has married his young niece, Marguerite Verroir.

Jean de Reszke and W. K. Vanderbilt were among the purchasers at the sale of yearlings from the Joyousland stud. The tenor brought the colt Ormeson for \$4,040, while Ontario for \$3,200 and Oasis for \$4,000 went to Mr. Vanderbilt.

James Abram Garfield, son of President Garfield, is to be married next month. His bride will be Miss Reba Williams, of Glenville, O., a friend from childhood of the Garfields. The young people traveled through Europe last year in company with Miss Williams' parents.

Tomagno, the tenor, has lost 1,500,000 francs in a real estate speculation at Rome, according to the Figaro. He bought a building and the adjoining land at a high price on a tip from an Italian deputy that the government wanted the property for a new ministry of commerce building, and found that the deputy had unloaded his own comparatively valueless land on him.

"No; nearly all infidels are old failures."—Chicago Record.

Snow fell in Tombstone this morning, which was an unusual occurrence thus early in the season. The ground was covered "the beautiful" a good part of the day, but on the appearance of old Sol bald patches began to appear, and by sundown there was not enough of it left to encourage sleigh-riding.

The robber killed at Stein's Pass was identified as a cowboy known in New Mexico and Arizona by the name of Edward Cullum, but letters found on his person indicate the dead robber's real name was J. A. Hespath, formerly of Colorado City, Tex., where his mother still resides.—Evening Headlight.

Garnets as large as walnuts and of great value are often found in the Grand Canyon of the Colorado. Two were recently blasted from a granite ledge 6,000 feet below the surrounding country. The Indians find them in the hills, where the ants bring them to the surface and the rains uncover them.—Ex.

The Pioneers have asked bids from attorneys with a view of commencing action against the Territory for the purpose of recovering the money embezzled by their late president, Fred G. Hughes. Under the act the demand should have been signed by the president and the trustees, but as two trustees only signed the warrant there is a possibility that the Auditor should not have paid it.—Citizen.

El Morey, well remembered in Prescott, writes to the Courier from Skagway, Alaska, under date of Dec. 4th, that he will go to the interior in the spring. He says: "I have my supplies all over to the lake now and came back here this winter, as the cost of living is much cheaper. Flour is worth \$1.65 per sack here, and at Lake Bennett \$2.50, and everything in proportion to the above."

The measureless popularity of Hostetter's Stomach Bitter, has been the growth of more than a third of a century. As in the past, the coming year will be ushered in by the appearance of a fresh Almanac, clearly setting forth the nature, uses and operation of this medicine of world wide fame. It is well worth perusal. Wolfe's cutter was out today and a high riding indulged in. As the cutter passed down Allen street its occupants were the target for a fusillade of snowballs. The cutter was put up for the day. This is the only cutter in this section of Arizona and was sent here years ago by some eastern firm who wanted to place their make in this market but forgot to look up our weather statistics. When ever snow barely covers the ground the cutter is sure to be pressed into use and affords much sport.

The climate editor of the El Paso Tribune has the following to say regarding El Paso ozone: "Is a silent force not appreciated, nor even commented on, and yet it is the greatest nerve force and life-giving and recreative power in El Paso. There are millions in it. Dead people almost are resurrected by it. It is here and all out of doors is full of it. You breathe it into your lungs and it tingles all through your anatomy; gives you new life, new energy, vital force and power. One whiff of it is worth twenty drinks of whisky or other stimulants. It electrifies the blood. There is more ozone in El Paso than any other point known."

ON THE JUDGES' BENCH.

The conversion of an existing single-track horse car railway into a double-track electric railway under legislative and municipal authority is held, in Reid vs. Norfolk City Railway Company (Va.), 36 L. The destruction of a house by an explosion of powder caused by a stroke of lightning is held, in German Fire Insurance Company vs. Root (O.), 36 L. R. WHETSTONE MINES.

A Promising Property to Be Developed.

Another mine has been located in this county to aid in the development of our mineral resources. Negotiations were closed Sunday, and the group of upper mines in the Whetstone, belonging to Messrs. London and Gallen and the property, developed by Messrs. Henry and Sanders who entered the area already noted at the El Paso section.

The land men who have secured a promising property are mining men of experience and education, able to thoroughly handle the property, after a visit to the mines they were much impressed with the showing and possibilities, and immediately entered into and closed the deal. It is understood the figures are \$20,000, and a cash payment made also. By the terms of the agreement a force of men will be put to work by the first of the year.

This property has long been considered a most promising one, and certainly was an inviting opening for capital. The indications and showing of ore on the surface impressed all miners who have seen it as having a great future and the making of a producer if properly opened up. Some excellent ore has been taken from here, and we hope to see these gentlemen develop it into a proposition of magnitude.
